Good Afternoon Ms. Beyler,

Providing the below update after today's conference call with the OSD FAP team. Apologizes for the length of this email, but thought it was best to include to get a better picture of the scope and the work coming our way.

Last week, OSD FAP and DoDEA met with SASC Professional Staff and also met with staff of Sen. McCaskill and Sen. Burr regarding the child on child sexual assault cases that have recently been in the media. Based on informal conversations, staffers were proposing they could drive the scope and tell DoD how to fix the problem - informal discussions even mentioned standing up a separate office to address. For SA, Sen Burr's staff also requested a follow-up meeting with Service Law Enforcement reps.

Although OSD FAP originally pushed back on this issue and didn't want to "own" the problem; they have been directed (by Mrs. Penrod) to get ahead of any "help" from Congress. Therefore, OSD FAP has assumed the lead for a P&R, ASD-level working group to address the response to juvenile sexual incidents branched into two areas; children, 12 and under, and adolescents, 13 and over.

Foundational Vision:

Response will differentiate between children 12 and under who are exhibiting sexual problem behavior, and adolescents involved in sexual assault.

FAPs main focus will remain on victim care and safety - lifting and formalizing a role that FAP already plays in these incidents involving non-caretakers.

FAP will not provide juvenile sex offender treatment. Civilian resources and treatment options will be identified, utilized, and shared.

FAP will NOT* have a role in tracking accountability but FAP may have a role in providing aggregate numbers of families served in support and clinical services. *This was stressed numerous of times. My concern --Congress wants someone to own this and have overall responsibility and accountability. Again, FAPs main focus will remain on victim care and safety.

The plan is to use existing structures and pathways in the current coordinated community response (CCR) and will scaffold from there. SAPR will be included in all discussions and will on the OSD working group.

The members of the OSD working group will mirror the members of the CCR. I attached a copy of the CCR membership roster for your SA.

Attention will be on the shared mission areas of the CCR - connections, interface, and cross-references in policy and procedures to reduce gaps. Unique CONUS and OCONUS issues will be addressed as rules and policy differ.

If Congress is able to provide funding for this issue, OSD will recommend strongly that any additional fund allocation go directly to the Services for execution.

OSD is seeking nominees from each Service to serve on the OSD FAP Service Advisory Team. Qualifications needed: experience working child abuse and neglect in the field, a high-level and in depth understanding of how the CCR functions on installations of various locations/sizes/mission, experience serving on action oriented working groups, ability to work collaboratively on an inter-disciplinary team. Anticipate the team to be activated for 6 months. USN and USMC FAP are aware of this and are working to identify participants. Nominees are due to OSD by 13 April.

Standing by for questions -- a lot of moving parts on this one.

V/R,
